Shah Installs New Government

By William Branigan

TEHRAN, Aug. 27 (WP) - Shah Mohammed Reza Pahlavi today sitting appointed a new premier, who immediately presented a "government of reconcialition" to give the coun-try's harried leadership an Islamic facelift and try to stem the tide of

WHEN IN A prosition violence.

The shah said that the new government would stress "Islamic principles," and it offered several minor concessions to moderates of

extremist elements in an effort to divide the opposition, and the shah. still firmly in charge, is evidently not giving up any of his own

anthority.

Faced with increasingly scrious opposition violence that has been flaring for the last eight months, the shah named former Senate President Jaafar Sharif-Emami, 68, Amouzegar, 55, who held the post for little more than a year.

Compromise Figure

NATENSIVE Mr. Sharif-Emami is known for maintaining contact with the Moslem clerical leadership. He is also considered an able politician who can serve as a compromise figure to appease the moderate politi-_ cal opposition.

The major surprise in the Cabinet switch was the dismissal of vet-eran Foreign Minister Abas Ali Khalatbari. He was replaced by Amir Khoshrow Afshar, a career · diplomat.

Five ministers retained their posts, including Finance Minister
Mohammed Yeganeh, who doubles
as Iran's chief representative in the
Organization of Petroleum Exporting Countries ing Countries, and War Minister Gen. Reza Azimi, who has survived several Cabinet shuffles in the past. Mr. Sharif-Emami said that the new government would "create an atmosphere of reconciliation among all classes of the people.

TURN Among several principles he pack enunciated was respect for the state PASI Shifte Moslem religion and the FOR Country's Moslem clergy. He also CLASSIF called for free elections, freedom of

clashes broke out in several Nicara-guan towns and a general strike aimed at ousting President Anasta-alition of 15 p sio Somoza spread yesterday in the aftermath of the terrorist takeover

of the National Palace.

And an archbishop of the Roman Catholic Church in Nicaragua has taken the unprecedented step of calling for the resignation of Gen. Somoza as the only way of

ending the political violence.

Catholic bishops have carefully monitored, and frequently denounced, the level of repression hy the government, even referring sympathetically to young Nicaraguans who have taken up arms and given their lives in the struggle

against the Somoza family. But this month Archbishop Obando y Bravo specifically urged that Gen. Somoza leave office and make way for "a national govern-ment of transition." The alterna-tive, he said, would be more and more violence, either through a revolutionary insurrection or govern-

Much of the Nicaraguan church is considered progressive, and the country's bishops have adopted increasingly more radical positions throughout the year as the movement against the regime of Gen.

"The church doesn't want to be left behind by the people," a political analyst coted, but it also thinks that it can still act as a bridge between the polarized positions of the opposition and of the

Jinotepe Clashes

The armed clashes, which persisted throughout the day in three-districts of Jinotepe, involved army troops and Regional University Center students at Carazo University, who were trying to force finotepe businessmen to join the general strike.

Quotations of New Pontiff

ROME, Aug. 27 (AP) - Here are selected quites from the writings, sermons and interviews of Cardinal Albino Luciani, who became Pope John Paul I yester-

On the papacy: "It requires especially three things — continuous and involved teaching; a dialogue unknown in previous times and loyalty to the (Second Vancan) Council." From a 1977 sermoe at

the Italian Eucharistic Congress in Pescara.

On himself: "Well, if I hadn't been a bishop I would have wanted to be a journalist." In an inter-

 On a French doctor-priest, Marc Oraison, who said that even bomosexual love was Christian: "If a priest preaches as he does, everything is ruined, Now even nuns are starting to dress like young ladies. And what about certain theologians? They have forgotten that a theologian is not just someone who speaks of God hut also speaks to God. How many of them speak to him and help us speak to him?" In a 1976

• On the priesthood: "I hear people saying, The priest has lost his identity card," It is not so. Let's not lose too much time in asking who we are, because it is not a question of defining our priesthood but of living it. The example of Christ is before our eyes — meek and humble, chaste, poor and obedient." From a re-

On theologians; "We cross sometimes into fic-tinn-theology instead of theology. Certain working hy-

views or congresses. On the contrary, we find them in all newspapers. Some, instead of limiting themselves to being vanguard theologians, become, according to the expression of Hans Kung, sniper theologians." In a 1974 article, Dr. Kung is a Swiss-born theologian.

On Sir Walter Scott, one of his favorite novelists:

"He was Scottish and Protestant. His anti-popism irked me, but he was a gentleman, very delicate, a clean life. I took him as symbol of cleanliness. His books always extol worthiness, loyalty, fidelity, values that today are no longer honored the way they should be by certain Catholics and even certain priests." In

· On the church: "In the modern state, authority comes from the grassroots. They elect representatives and confer upon them power, control its exercise and possibly take it back. In the church it is different. Christ established once and for all the essential features. Christ himself — and not the grassroots — confers authority on the pope and the bishops, also specifying in what way to exercise it. That is, with a style of service, to the full and only advantage of the faithful who appear as younger brothers to their pas-tors rather than subjects, embarked on the vessel of the church not as passengers but as co-responsible

On change in the church: "It is necessary to know how to build on top of what exists, often being content with what we already have."

election in one of the shortest conclaves in modern church history proved, according to churchmen, that the cardinal electors had reached a broad consensus even before they entered into seclusion Fri-

day night. He is said to have had early support from various United States and Latin American cardinals as well as from the West German hierarchy. Italian cardinals rallied be-hind him because he appeared to them a compromise candidate who might bridge what could have de-veloped into a rift between liberals and conservatives in the Italian and

The throngs in St. Peter s Square and televisioo watchers in many countries got their first inkling that the church had a new Pontiff when grey smoke poured copiously out of a chimney surmounting the Sistine Chapel at 6.24 p.m.

world episcopacy.

There was much guessing whether the smoke signal was meant to be black — meaning another inconclusive ballot - or white, announcing that a new pope had been elected. For half an hour four more bursts of smoke came from the flue over the 500-year-old chapel, but the color remained ambiguous as the sun was setting.

Doubts Over Smoke

By David Binder proved the Dresser Industries sale

WASHINGTON, Aug. 27 (NYT) - The Carter administration, responding in part to pressure from Congress, has decided to reconsider whether to allow export of advanced hard-metal technology to the Soviet Union.

The decision involves the granting of an export liceuse to Dresser Industries of Dallas for a \$144-million project that would enable the Soviet Union to manufacture highquality tungsten-carbide drill bits for oil exploration.

Earlier this year the United States Army made a study that concluded that in time of war the tungsten-carhide technology could be converted into production of armor-piercing anti-tank projec-tiles. But the Pentagon also concluded that the tungsten-carbide technology already existed in the Soviet Union and was also available in countries that were not alhed to the United States, a Defense Department spokesman said yester-

According to White House spokesman Jody Powell, the president felt that he needed to be in touch with members of Congress about his faltering plan to deregulate natural gas prices, a key aspect of his energy legislation.

Historic Baalbek Wastes in Battle-Weary Lebanon

By Marvine Howe

BAALBEK, Lebanon, Aug. 27 (NYT) — Before you approach the great temples of Bacchus and Jupiter, you must pass through the new ruins of Baalbek. Fields of mutilated and vandalized automobiles rise on the borizon like monuments to some terrible

modern deity. The Baalbek junkyards are memorials to the 1975-76 Lebanese war, whose violent and lawless reflexes are not yet over. Cars stolen during the fighting in Beirut, and even oow, wind up here to be plundered for a thriving new spare-parts industry. The visitor is warned not to leave his car on the main street overnight or it, too, might disappear. Residents observe that it is not

for the archaeological treasures or the fine, dry climate that car fences have been attracted to this historic site, 50 miles west of

The current state of lawless-

'What's Happening Here is Worse Than Death . . oess "is worse than the destruc-

tion and death in Beirut because it is the disintegration of society," a sociologist born and bred here laments.

Fendal Families Baalbek was traditionally known as a frontier sector outside the anthority of the state. It was governed by a group of feu-dal families who had their own law. There was a strong community spirit, people recall, with Christian and Moslem families living together in peace. When there was a funeral or a wedding in the community, everyone

would turn out. "Since the war, people have changed," a lawyer says. "There's less tolerance and some men will steal from their best friends." Some members of the old ruling clans have gone, particularly

Christians, who are a small

minority. Newcomers have appeared because Baalbek is safer than Beirut People who have made money during the war are building houses all over the region and investing in new

And, of course, there are the Syrians, who dominate the Arab peacekeeping force and whose influence is strongly felt here be-cause of the proximity of Syria.

Hashish Problem

For the first time, Baalbek has a drug problem. This has been the center of the hashish industry for a long time, but it was essentially for export. Foreign hippies are blamed for introducing local youth to hashish about five years ago, and now there are dozens of smoking pariors around town.

Young people say they smoke hashish because they are bored. There is nothing to do in Baalbek

- only two movies in town, no swimming pool, no sports clubs, no alternative, no future. The petry hashish-pushers are

threatening what tourism there is. A foreigner cannot walk downtown without being accosted, wheedled, threatened by the teen-age traders. A while back, an American and an English visitor were inter-

cepted on the main street of Baaibek by three teen-agers, who mistook them for Dutch drug dealers. The protesting visitors were abducted to a farmhouse on the outskirts of town, given an elaborate lunch with whiskey and arrack (spirits) and held prisoner until "the bess" came.

When the comedy of errors was finally unraveled, the dealers insisted that their forced guests pay for lunch at \$17.50 a head. There are few visitors nowa-

days to this town, which in antiq-uity was a popular site for pil-grimages. "Tourists won't return till there is peace in the Middle East," says Michel Alouf, whose family owns the handsome old Palmyra Hotel, opposite the ancient acropolis.

"Baalbek is dying and something must be done to save it." says Nahla Haidar Hamdan, who comes from one of the old Baalbek families and now works in Beirut for the UN Economie Commission for Western Asia. Like most Baalbekis, Mrs. Hamdan believes that the town's salvation lies in a revival of the

Baalbek International Festival. The festival of theater, music and folklore had been held annually from July through Septem-ber since 1955 and was without par in the Middle East.

At the Ministry of Tourism in Beirut, officials said they were "hopeful" that the Baalbek Festival could be resumed next year.

New Pontiff Noted for Humility

By Ina Lee Selden

ROME, Aug. 27 (NYT) — Pope John Paul I, the son of an Italian bricklayer, has gained a reputation as a mild-mannered man with an easy smile but with a stern view of what he sees as immorality.

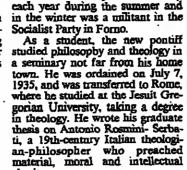

Generally viewed as a conservative theologian, be supported the decisions of Vatican II but showed no strong desire to go beyond them. He also supported Pope Paul's opposition to allowing women to become priests.

As patriarch of Venice, the post

papacy, he denounced what he saw position as patriarch. On these ocasimmorality in the city's free-and-cassions he tucked his red cardinals hat into his shirt and stuffed Biennale art show and annual film festival there.

In 1974, he sent individual letters to more than 20 of his priests warning them that their support of a law allowing divorce was causing in Forno di Canale, a small town "scandal and confusion," and he north of Venice. His father went to threatened to forbid them to say mass if they persisted.

Known as a humble person in Venice, he could often be seen taking the public motorboats wearing simple garb of the priesi rather from which he was elevated to the than the elaborate garments due his

his heavy gold cross in his pocket.

He was close to Pope Paul VI, who

personally told him of his coming

The 263d pope was born in 1912

elevation to cardinal in 1972.

For his vacation, he returned to his native region to work in the fields. After his studies, he returned to his home town as parish priest, the first in a long series of appointments that would give him vast pastoral experience.

Lesson in Scandal

Soon after he was appointed bishop in the region of Venice in 1958, a scandal broke out. Checks drawn on the diocese for several hundred million lire bounced. Rather than invoke ecclesiastical privilege, or immunity, normally granted according to Italian law, he called a meeting of the 400 priests of the diocese and held the scandal up as a lesson and decided to honor all the debts, some of which had to be paid with income from church

As member of the Italian Bishops Conference, he had a reputation for studiousness. After his appointment as patriarch of Venice in 1969, he stripped the office of much of its pomp and ceremony. He authorized the churches in his diocese to sell their gold objects and give the proceeds from the sale to the poor, saying that "the true treasures of the church are the poor," and the true task of the church was to help them to help

He used a bicycle for his pastoral visits and wrote articles for local

Faced with the problem of or-ganizing church worship in Mestre, the industrial area near Venice almost completely lacking in church facilities, he was outspoken in criti-cizing the militant activity of the Socialist and Communist unions in the oil refineries and petrochemical plants. But he also faulted the church because it had "taken sides with interests of management, swallowing the violence engendered

A Broader View

He has been described as having a broader view than many Italian bishops and he has managed to maintain relations with more liberal German and Dutch bishops at Vatican II when other Italian churchmen were strongly opposing their programs.

[Pope John Paul, though widely regarded as a conservative, has urged that Catholics be allowed to use artificial methods of birth control - advice that was rejected by Pope Paul VI in his 1968 encyclical,

SEOUL. Aug. 27 (UPI) — Ten persons were killed and 40 injured when a passenger bus collided with a trailer-truck on a highway south of here today, police said.

Complex Decisions to Make

New Pope's Tasks Range From Ceremony to Policy

By Paul Hofmann

ROME, Aug. 27 (NYT) - Tasks episcopacy a higger say in church

In due course, Pope John Paul I will have to make decisions regarding two vital areas. One is the government of the Roman Catholic church - should it remain practically an absolute monarchy or should the pontiff share his powers with the world's bishops? The other problem area is the future of interfaith relations.

But before grappling with these fundamental issues, the new spiritual leader of 700 million Roman Catholics will have to comply with age-old Vatican traditions, going through a series of ceremonial acts and making appointments to key posts in the church.

He will have to set a date for his coronation, which will be celebrated every year during the new ponti-ficate as the pope's anniversary. The newly elected head of the

church may want to take time to ponder and to consult with others or, conversely, he may already have clear ideas as to what should be ment today strengthened the im-pression among churchmen and diplomats here that he intended to done, and may be impatient to air pursue a course of moderate re-Before or after the coronation, he

will have to take formal possession of the ancient Basilica of St. John Lateran. This church on the southeastern outskirts of Rome, going back to early Christianity, is the pope's cathedral in his capacity of the city's own bishop. Normally, pastoral work in Rome is su-pervised by the cardinal vicar, but when the new bishop takes over, he traditionally discusses the religious day the violence-racked capital of Italy and a problem-ridden metro-politan area of more than three million people.

Again, the pope's first speech as bishop of Rome will he analyzed with utmost interest. How will he visualize the role of the Communist-dominated city government? Will he make concrete proposals to improve the conditions in which the hapless inhabitants of the city's slum districts live? Before or immediately after the

coronation, he must name a cardi-The pope also advocated a "senal secretary of state, his chief rene and constructive dialogue" with "those who do not share our aide, and reconfirm or replace a score of other prelates in top positions in the Roman Curia.

These appointments will deter-mine whether he will dominate the formidable bureaucratic machinery of the curis or whether it will domi-

Pope Paul VI, himself a product the curia, strove throughout his 15 years as its supreme head to curtail its power. Church historians will evaluate to what extent he succeeded. The undisputed fact is that the curia is still wielding enormous influence throughout the universal

The curia's power center is the secretariat of state. Its 200 or so multilingual officers, most of them at least monsignors and all of them sworn to secrecy, handle the Vati-can's foreign relations, including its delicate dealings with Italy, and supervise all other curia departments.

Cardinal Jean Villot, a 72-year-old Frenchman, is not expected to be retained in the post by the new pontiff. Cardinal Villot served also as camerlengo, or chamberlain, of the church during the interregnum between the death of Pope Paul and the election of his successor. heading the curia as an interim chief.

The choice of a new secretary of state will provide significant clues as to the way Pope John Paul in-tends to cope with the curia. So will his decisions regarding the leader-ship of the nine Sacred Congrega-tions, the main departments of the church's central administration. Some of them, such as the Congreation for the Doctrine of the Faith, or the Congregation for the Bishops, are more powerful than others, such as the Congregation for the Causes of the Saints, which deals with beatifications and

canonizations. However, all nine major curia departments carry weight. They are surrounded by a maze of tribunals, commissions, secretariats amd other bureacratic bodies. The entire curia staff exceeds 3,000, most of them priests.

The relationship between the

new pope and the curia will reflect the future form of church govern-ment. The Roman church's Ecumenical Council Vatican II, held in 1962-65, pronounced itself in favor of a "collegial" government by the pope jointly with the bishops throughout the world. To give the

of awesome complexity are awaiting the new pope almost from the moment of his election.

1 asks opiscopacy a nigger say in church government, Pope Paul set up the bishops' synod, a body of about 200 prelates that met in the Vanceat intervals of two or three years to discuss ecclesiastical policies However, Pope Paul used the synod essentially as a consultative group and failed to confer legislative pow-

In public statements and reconmendations after Pope Paul's death, various cardinals and bishops expressed the hope that his successor would be a "synodal pope," meaning that he would at. sign new responsibilities to the episcopacy and its representatives at the Vancan. At the same time ecumenists in the Catholic church advocated new efforts to bring about closer ties with other Christians and improve relations with Jews, Moslems and members of other faiths. The ecumenical challenge will undoubtedly be high on the crowded agenda of Pope John

Appeasing Moderates

Diplomatic sources said that concessions of this kind might be a step towards appearing the moder-ate clergy, but that they were mate clergy, but that they were in-likely to stop mounting opposition violence by more hard-line religious elements who want to end the shah's 37-year rule.

Although Moslem leaders here are loath to admit it, there are signs

here of a widening split between the moderate clergy, led by Ayatollah Seyed Kazem Shariatmadan and the hard-liners, headed by Ayatollah Ruhollah Khomeini, who

According to well-informed dip lives in exile in Iraq.

According to well-informed dip lives is working to divide the moderate and radical factions even more, so was that the oppostion can be more ear-

At the same time as the shah offers concessions to the moderates, the sources say, measures of tough repression appear to be in the works for the radicals. Already, they say, some of the more extrem-ist muliahs (Moslem prayer leaders) are being rounded up or exited to remote parts of the country,

Air Controllers In France Slow **Europe Traffic**

PARIS, Aug. 27 (NYT) — The fifth slowdown by French air traffic controllers in two months has caused a scrious disruption of flight schedules in several European

Countries.

Officials here said that the airports affected most scriously were Palma, on Mallorca, Gatwick in Britain, Schiphol in the Netherlands, and Marscilles. At Palma, traffic became so clogged that the airport was closed for an hour, even though 26 arriving flights were diverted to other Spanish airports. During the weekend, the peak of the vacation season, at least 1,000 flights were scheduled for Palma_

At Gatwick, 4,000 travelers were facing hours of delays for departures to southern Europe. Airport authorities opened special waiting rooms yesterday in anticipation of

At Schiphol, near Amsterdam delays of up to three hours, particularly for charter flights, were reported. Delays of 45 minutes to four hours were reported at Marseilles's Aix-en-Provence air-port. Traffic at Roissy and Orly airports in Paris was reported close to normal, with delays averaging only about haif an hour. The controllers, protesting work

rules, are handling a maximum of eight flights at a time. Normally, handle twice that number. They are deadlocked in negotiations with the government over economie and air safety issues.

Soviet Union Reported Testing Spy Satellite With Month Orbit

WASHINGTON, Aug. 27 (WP) - The Soviet Union is believed to be testing a new type of spy satellite that can stay in orbit and photograph the Earth for a month at a time, double the time that previous spy satellites could stay in orbit. Western space observers

say.

The satellite is identified by Western space experts as Cosmos 1028, launched Aug. 5. It is still in orbit, following a path that takes it as close as 110 miles to Earth. The orbit inclines it at a little more than 67 degrees to the Earth's equator, which means that it follows a path that takes it over most of China, Western Europe and the United States. The satellite completes an orbit of the Earth every 89.28 minutes.

Western experts believe that the new satellite is a reconnaissance version of the Soyuz spacecraft that carries Soviet cosmonants into orbit. The older Soviet spy satellite was said to be a rebuilt Vostok spacecraft, which is smaller than the Soyuz and carries less fuel to keep it in orbit and fewer cameras and less film to maintain recon-Because of the previous two-week orbit limit, the Soviet Union

may have launched as many as 30 spy satellites a year in times of tension, such as the wars in the Mideast, an operation that would have cost more than \$1 billion a year.

Senate Prospects Doubtful

Carter Aides Attempt To Save Natural-Gas Bill

By Richard Halloran

Carter Administration have made an attempt to save an evidently sinking oatural-gas bill that is an important part of the president's energy program.

At a White House news confer-

ence Friday, the president's assistant for domestic policy. Stuart Eisenstat, read a statement on behalf of the vacationing President Carter that said enactment of the bill "is essential to protect the stability of our strong and vital economy and to protect our dollar and position of ecocomic leadership in

At the same session, Energy Sec-retary James Schlesinger defended an understanding reached with Sen. James McClure, R-Idaho.

Sen. McClure agreed last week to support the natural-gas bill, baving been assured of a \$1.5 billion commitment by the administration to proceed with research on nuclear

Euphoria Passes

A week ago, there was a mood of cupboria around the White House as Mr. Carter personally an-nounced what he called a break-through on the long-delayed natu-ral-gas legislation that would allow it to be sent to the Senate floor for final approval.

of 18 senators of varying policical philosophies bave urged the defeat

WASHINGTON, Aug. 27 (NYT) of the bill, which is intended to re-Two senior officials of the move price controls and thus to promote the production of natural

Other prominent senators, including Russell Long, D-La, have let it be known that they intend to vote against the bill. Still others, such as Minority Leader Howard Baker Ir. of Tennessee, have raised

serious doubts about supporting

the bill because of the agreement reached with Sen. McClure. Opponents of the bill, such as Sen. James Abourezk, D-S.D., have claimed they have enough votes to defeat the bill in a straight vote and may not have to resort to the filibuster they had planned earlier.

'Responsibility' Invoked

In an apparent effort to turn back that ude, Mr. Eisenstat said Friday that "the president is con-vinced that the United States Sen-ate and House of Representatives will rise to their responsibility." He continued. "The president expects that this matter of critical oational importance will not be obscured by

other issues."

Mr. Schlesinger said the agreement reached with Sen. McClure was close to the policy that Mr. Carter had set down since his first days in office and was not a change in that policy. He denied that a deal had been struck for Sen, McClure's support. But he conceded that the timing of the nuclear agreement and McClure's support for the bill was "not coincidental."

U.S. Sued on Use of Aid In Caring for Retarded

By Richard D. Lyons WASHINGTON, Aug. 27 (NYT) - Two organizations representing the interests of the retarded are suing the Department of Health, Education and Welfare in an effort to stop the federal government from using funds to centralize the care of such persons in large insti-

Their aim is to care, if possible, for the mentally retarded in small institutions more like nursing bomes and closer to a pacent's family and cultural origin. Class-action lawsuits have been

filed by the Kentucky Association for Retarded Citizens of Frankfort, Ky., and the Mental Health Law Project, which has its headquarters

The first suit, which includes as plaintiffs four mentally retarded persons who are patients at the state mental institution at Outwood, Ky., seeks to prevent the state from building a modern facility nearby.

Remote Area

The suit argues that the area is so remote that it is not served by any Sublic transportation system, and hat construction of such a facility would contravene federal law callng for the treatment of the mentaly retarded, where possible, in troup homes, foster homes and ther community-based residences.

Ghana's N. Korea Envoy TOKYO. Aug. 27 (UPI) - Jhana's first ambassador to North Corea, Kofi Baah Aidoo, arrived in yoogyang to take his post, the North Korean news agency report-

The second suit accuses Joseph Califano Jr., secretary of HEW, of seeking to spend \$55 million to re-novate St. Elizabeths Hospital, a huge psychiatric institution in the District of Columbia.

sume budgetary restraints.

St. Elizabeths, which is owned by the federal government, has 2,300 beds for patients of varying degrees of mental incapacity. The institution is deteriorating and the lawsuit seeks to have it remain so and spend improvement funds instead on smaller, neighborhood centers where many of the St. Elizabeths patients might be able to bve.

Decentralization Sought Since the enactment of the Community Mental Health Center Act 15 years ago, the federal government bas attempted to decentralize

the care of the mentally ill. An attorney for the mental bealth law project. Margaret Ewing, contended that, despite the statement of deinstitutionalization principles in federal laws and state health plans, many health-planning bodies such as the Kentucky Department of Human Resources cas-ually approve application for the construction and renovation of new

institutional facilioes. Miss Ewing and other attorneys for the law project also argue that it is less costly to care for the mentally ill in smaller, community-based institutions. At St. Elizabeths bospital, cost per patient last year was \$33,000, about twice what the ours-

ing would cost, they said.

Earlier this year, judges in Pennsylvania and Maine upheld the thrust of the current Kentucky and District of Columbia suits. In both cases, the judges ordered patients moved from large state institutions into community-based facilities.

The first SALT agreements were

ed, according to informed sources.

One idea was to submit the most controversial document of the three currently being negotiated - a protocol governing modernization of offensive strategie weapons - as About a month ago, the presi-dent instructed U.S. negotiators in fering less controversial aspects as Geneva to tell their Soviet counter-a treaty.

In Wyoming, Mr. Carter's press secretary, Jody Powell, said that the president was considering the use of an executive agreement instead of a treaty on SALT, although no decision had been made. Mr. Pow-ell said that the use of an executive agreement would be considered "as a valid option. There is no reason to close out any option at this time. There are good arguments both

U.S. Fare War Unlikely, Say **CAB Officials**

WASHINGTON, Aug. 27 (UPI) — U.S. aviation officials cautioned travelers against expecting an airline fare war be-cause of the Civil Aeronautics Board decision last week to allow airlines to raise and cut domestic fares without board approval.

"I don't anticipate a price wa or really dramatic cuts," a CAB official said. "I think the airlines will first experiment in a couple of markets to get an idea of how it will all work out." The board voted 4 to 0 on

Friday to give the oation's air-lines the flexibility to lower fares by as much as 70 percent and raise them by up to 10 percent without government The decision takes effect when published in the Federal Register, possibly within a

"Consumers should not look for reductions in every market," a CAB official said. "Some will go down, some up and some will stay the same. It really depends on bow the airlines view the situacion."

monies in favor of a safe escape.

Behind them were five balloons, multicolored and tethered, and near them was a replica of the Spirit of St. Louis, the plane in which

Charles Lindberg crossed the At-lantic by air half a century ago. "Now that our three famous citizens of New Mexico have made a triumphant crossing of the Atlantic Ocean in a balloon in the name of the United States," a resident reother parts of the country will fi-nally get it through their thick skulls that New Mexico is really a

part of the United States." The three came bome to the city that boasts a world champion balloonist, a national champion and an annual October balloon festival that draws cotbusiasts from throughout the world.

BALLOON! BALLOON!

They were treated to a cheer of "BALLOON! BALLOON! and to

a song written in their tribute: From Albuquerque right by the silvery moon, they sailed across the ocean by balloon. It is said by those who live here that ballooning has become popu-lar in these parts because of the ide-

al year-round weather.
You tie \$5,000 up on a toy and use it only two or three months—you're limited," said Michael Cor-lew, 34, an officer manager who has been ballooning for 3½ years. "Here you can use it year-round, I used to fly in Texas and every time we landed we used to light with the farmers. Here, there is so much open land and public land that you

can go for miles."

Balloonist Sheri Bachtell noted

that there are millionaire balloon-

ists and that "there are people who don't know where their next bottle of propane is coming from." "Here, it's the people, laid back and friendly," said Linda Niswan-der, who has worked on a balloon crew for two years. "They aren't like that everywhere. If I were

someplace else I might not be in

It was a day of nothing but friendliness and pride for this city of 330,000. It was a fitting climax to an event two years ago, when some Albuquerque balloonists formed a balloon fiesta committee and its new chairman proclaimed: What we feel is very important is that Albuquerque be known as the Hot-Air Balloon Capital of the NEWARK, NJ., Aug. 27 (UPI)

Judge Lacey said that new information on the activious of the two

According to the new information, Mr. Enger, using the name Jim, contacted a U.S. naval officer and asked him to obtain top-secret defense material. The officer alerted authorities to the request. Mr. Enger allegedly instructed the officer to leave the material in

empty food containers in various "drop sites" around the state. Jim

allegedly sent the officer a letter

two were "prime movers . . in espionage against the United States."

and said that be would pay cash for a continued supply of military The oew information also said that it was Mr. Cheryayev who made the actual pickup of material from the drop sites.

Jim wrote another letter to the officer requesting material on sub-marine acoustic detection systems and instructed him to deposit it in an orange juice container. That container was seized from the third defendant, Mr. Zinyakin, and allegedly contained the material on

In his original ruling, Judge La-cey said that the container was ille-gally seized because of Mr. Zinyakin's diplomatic immunity and would not admit it into evidence. However, in his new determina-

tion, the judge said "Zinyakin knew that the information in the carron was national defense information related to the security of the United States obtained through violation of the laws of the United States and bence property which he intended to steal.

Last Licks at Inflation

President Carer's main inflation fighter, Robert Strauss, is no longer making jest of his assignment. He hegan the effort to talk down prices and wages by saying inflation was leading, by a score of 100-0, in the early innings. He claimed later to have scored a run or two and to be "gaining" on the cost of everything. He knows now, along with everyone else, that the strategy of asking business and labor to hold increases below those of the last two years has failed. Prices are rising at an annual rate of more than 10 percent and will amount to about 8 percent even if the cost of food increases more slowly, as expected, in the mooths ahead.

tn Mr. Strauss' metaphor, and President Carter's tenure, the game is fast approaching the climactic final turns at bat. The inflationary sins of the recent past have now been absorbed by the economy. A few months remain before the teamsters, the auto workers and other pace-setting unions renegotiate their wages. When they are done, in early t979, other unions and the still targer nonunion segment of the labor force will demand the same or better and business firms will build the new labor costs into their price

If Mr. Carter and the leaders of labor and business fail to find a formula for restraint in this next round, they will have to settle for a major restraint on the money supply hy the Federal Reserve Board — the polite phrase for an induced recession. And no one, here or abroad, will profit from another American recession, least of all a President seeking reelection.

This is the meaning of the now daily plea by William Miller, the chairman of the Fed, that he not he left to do the job alone; recession is his only weapon. He wants the country to acknowledge the failure of Mr. Strauss' vague jawhoning. He contends that unions and businesses that want to cooperate need a measurable standard - what used to be

called a wage and price guideline - sel before them. And he has even suggested that they may need an incentive, a tax reduction for good behavior or a tax penalty for had, to meet the standard.

The psychology of Mr. Miller's counsel seems elementary. No one wants to hold down his own prices or wages without some assurance that the next fellow will do likewise. Such counsel has been rejected in the past simply because guidelines and monetary incentives are perilously close to the point at which voluntary standards become enforceable controls. And government controls, all sides agree, are worse than the disease. The mere fear of controls could set off a spree of inflationary price increases.

Mr. Carter, however, should he ahle to move to guidelines without undermining his pledge to avoid controls. The pledge may seem no more reliable than President Nixon's proved to be in 1971. But Congress has since rescinded the standby authority to impose controls; there can he no overnight surprise. So instead of flailing at "special interests." Mr. Carter needs in the time remaining to persuade the country that we have all become special pteaders and selfish engines of inflation and to raise a measure of restraint by which all can be judged. His aides have talked in terms of a 6 or 7 percent wage increase in 1979 and of a comparable limit for price increases — minus the gains in labor productivity — or a rise of 4 to 5 percent.

Not all will heed even such a standard. But in a credible atmosphere, where the many practice restraint, there is no shortage of devices for punishing the few. Tax hreaks for some or penalties for others, or even controls, could then be applied selectively to reinforce a national will. But first there must be such a will and a quantifiable standard hy which it can be judged.

THE NEW YORK TIMES.

The Strategic Oil Reserve

Storing very large volumes of oil, rapidly, turns out to be not quite so simple as the Carter administration had originally thought. It is easy enough in principle. You find a large underground cavern, pour in the oil and, in the event of an emergency like the Arab oil embargo, pump it hack out to the refineries. The technology has been in use for decades. But it has never before been applied on the present gigantic scale, and the reserves have fallen far behind the administration's amhitious plans.

In late 1975, responding to the Arab embargo. Congress established the strategic petroleum reserve with a firm requirement that it was to contain 150 million barrels of oil hy the end of this year. By the end of 1982 at that time, the equivalent of three months' imports. Unfortunately, the country's oil imports have nearly doubled since then. When Mr. Carter came into office, he immediately raised the targets for the reserve to 250 million barrels by the end of this year and 500 million by 1980. The idea was to demonstrate the vigor of the new administration. How is

it coming along? Slowly, so far.

The Energy Department located a series of caverns along the Gulf Coast and began fill-ing them last summer. The amount now in storage is only about 40 million barrels. The rate of filling the reservoirs is running around 225,000 barrels a day, although the Energy Department hopes to get it up to 800,000 barrels a day by the end of the year. The Energy Department currently hopes to get 125 million barrels in underground storage by the year's end, or in January at the latest. It will unfortunately fall short of the original statutory goal, let alone the Carter administration's much more ambitious one.

The delays have been, perhaps, inevitable. The reservoirs are caverns originally created by chemical companies in a process that uses

water to mine salt and other soluble minerals. Fresh water is pumped into underground deposits, and the minerals are recovered from the outflow. When the government took over the caverns, most of them were full of brine. Pumping it out is easy enough, but getting rid of hundreds of thousands of barrels of it every day - without inundating the state of Louisiana - is proving more difficult. The Energy Department has been drilling deep wells to reinject it into the earth. But the wells are having trouble handling the rising volumes. Eventually there are to be pipelines to carry it out to the Gulf of Mexico. But laying the lines takes time, and there is also the question of - ah, yes - the environmental impact. Some ecologists are worried about the effects on the gulf of this vast dumping operation. The Environmental Protection Agency is brooding on the case.

Regardless of the justification, the delays give cause for concern. The Senate Energy Committee is planning, correctly, to hold oversight hearings later this year. To fall behind in the oil-storage program only reinforces the worldwide impression that the United States does not take its energy commitments seriously, and cannot be relied on to meet its targets.

But it is not only a matter of the political consequences. The domestic oil industry is now capable of producing only a little over half of the oil that Americans consume. If anything should happen - embargo, war or natural disaster — to interrupt the flow from foreign wells, this country's only shock absorber would be the strategic reserves. The present reserve represents less than six days' imports. No one can measure mathematically the prohability that imports will be cut off in the future. But it has happened before, and only the most foolish will permit themselves

to believe that it could not happen again. THE WASHINGTON POST.

International Opinion

Chairman Hua's Travels

China came to be seen as an ideal and safe counterbalance to the Soviet Union. Just by silting there next to the Soviet border, it forced Moscow to divide its attention and resources. In the 10 years up to 1977 over 10 percent of Soviet defense spending went to its forces along the Chinese border. This was more than Moscow spent on its forces facing

Chairman Hua's visit to Romania and Yugoslavia, preceded by trips around the world by lesser officials, marks a clear break with this period of passivity. It is no longer a question of the West making use of China. The Chinese are determined to make use of us, too. China is well and truly in the world power game - and not as a card, but a play-

of the agency to do its recruitment

work in counterintelligence

should negotiate with CIA repre-sentatives in a public booth in the middle of Harvard Yard. Perhaps it

would be prudent to suggest that they be tattooed, so that no one, anywhere, should ever be free to say that Harvard University contributed, however passively, to the defense of the United States.

Downey's Case

Meanwhile, we have it all from a man who suffered a great deal for his country. John Downey was freshly graduated from Yale Uni-

versity when, as a CIA flier, be was

sbot down over China and spent 23

NEW YORK — In Canada, the prime minister, Mr. Trudeau, has brought an indictment against a journalist under the Official Secrets Act, which is accurately described by an attorney as making it silently, through individual professa criminal offense to publish a classified document revealing how many cups of tea the average Canathat Harvard students who desire many cups of tea the average Cana-dian drinks. Much of Canada is up in arms over the indictment of the Toronto Sun's Peter Worthington, the first oewspaperman in Canadian history to be had up under that vague and ominous act.

There is no question in anybody's mind," wrote the editor the Edmonton Journal, ". . . that the decision to prosecute the Sun was based on a vindictiveness, presumably following the old John F. Kennedy dictum, 'Don't get mad—get even.' "You see, Worthingloo and his paper are irreverent critics of Trudeau, and the gentleman does not suffer criticism glad-

Not Enemies

statement by Trudeau in Parliament to the effect that although it may be true that the KGB is an enemy of Canada, it is oot true that the Soviet Union is an enemy of Canada. That is on the order of saying that a mugger's right arm should be prosecuted, but oot the mugger. Trudeau expanded by saying that presumably there were CIA agents operating in Canada, but the United States is not an enemy of Canada. Right on. Neither is the CIA an enemy of Canada. It is not engaged in stealing Canadian secrets, encouraging Canadian separatism of — a mistake, perhaps

 — disparaging Pierre Trudeau.
 But notwithstanding Peter
Worthington's vietimization (be proceeded to publish an account of KGB activity in Canada) he favors an Official Secrets Act of some sort, believing that any government is crazy that does not take steps to protect its genuinely secret infro-

Which brings us to the case of Philip Agee. He is a former CIA operative, described in London's Daily Telegraph by its Washington reporter as — qooting an unnamed CIA counterintelligence officer — "probably the worst trailor since Kim Philby."

Philip Agee was recently in Havana, and it was there that he announced a new publication, to be called Covert Action. The principal feature will be a monthly revelation of the names of CIA operatives around the world, plus a guide to the means of detecting them. Having been exposed. Agee assures his readers, they will be rendered ineffective and probably have to leave. If they decline to leave, someone in the host country may take matters into his own hands. As was done two years ago in Athens when, after his name was given out, Richard Welch, CIA agent, was assassinat-

Reactions

Sen. Barry Goldwater has suggested that it would be appropriate to take steps to revoke Agee's American citizenship, and Sen. Linyd Bentsen has said, "I believe that appropriate who so recklessly." that anyone who so recklessly threatens the safey of our agents

should face the prospect of jail."

One would think these to be normal reactions in a country that is incidentally ebarged by history with containing the harbarians. More likely. Philip Agee will receive a Pulitzer Prize. Because the mood of the country, respecting the counterintelligence function, is amhivalent to say the least.

At Harvard, President Derek be was finally sprung by Nixon in the heyday of pingpong diplomacy. CIA's recruiting must be done "openly," tt has been the practice the heyday of pingpong diplomacy. John Downey, who had not seen a newspaper or an American face for a generation, returned to Connecti-cut and began to study law. Now he is running for political office for lieutenant governor of Connecticut. He is not biner about his experience; he is remorseful oo other grounds. About what happened to him, he says: "I knew what t was getting into. They told me what would happen if t ever got caught. If t blamed anyone it was myself." Why? "For being so dumb as to volunteer."

Was that really dumb? Yes, be-cause the world looked different in 1951, Downey goes on. There was a great deal of romanticism about what we were going to do. Basically, we all were highly motivated. We thought the United States had its back against the wall, and we were going to save the free world."

Now Downey knows that is all years in Chinese jails, from which bunk.

Season of Bad News For Moscow Leaders

By Robert G. Kaiser

would both regard that act as an anti-Soviet gesture.
So the Russians have probably

lost a potentially useful relationship with a rich and powerful neighbor — and lost it to their most hated enemy, which of course also happens to be a neighbor.

The news from Africa, one of

last semester's most active fronts

must also look glum in Moscow

The Organization of African Unity

came uncomfortably close to con-

demning Soviet and Cuban involve-

ment in Africa at its summer sum-mit meeting. The Namibia situs

tion, once a promising source of tension and turmoil in southern

Africa, appears now to be sno-cumbing to a sensible process of oegotiations. The Angolan govern-ment, once seen as a staunch ally of

the socialist camp, has been playing up to the Americans and even dealing civilly with the Mobutu regime in Zaire in an effort to stabilize

their common border.

Africa remains rich in potential for the machinaoons of Soviet diplomacy, but any end-of-summer

assessment in Moscow would have to conclude that the potential re-mains unfulfilled, and that new dangers of failure have material

The summer has also brought an

unexpected turn of events in the Middle East that cannot sit well in Moscow. When the vacation season

began Egyptian President Anwar

Sadar's peace initiative appeared to

be expiring, raising a range of new possibilities for Soviet diplomacy. Now, suddenly, the initiative has

been revived dramatically by the

Camp David summit. Of course the

leaders in Moscow can hope for to-

tal failure, but they also must recognize the possibility of significant success at Camp David.

U.S. Complications

WASHINGTON — Chairman Hua Kuo-feng's remarkable trip to Romania and Yugoslavia prompted a revealing tidbit of news the other day. According to a dispatch, Romania's leaders long recognized as a crafty lot —
decided this was a good time to explore anew the limits of their strange alliance with Moscow by inviting Hua to make anti-Soviet noises from the Soviet hinterland in Romania tt was a good time, the Romanians reckoned, because the Soviet Union is weak at the moment and preoccupied with difficulties it is having in Washington

and Peking.

A faltering Soviet Union? The point could be overstated, but there is a kernel of Balkan wisdom in that Romanian observation, one worth noting on the eve of the new diplomatic semester that will open

officially with the September summit at Camp David.

As summer ends, the Kremlin's leaders (most of whom have speni recent weeks on the Black Sea coast, not in the Kremlin) cannot be supposed by the interest of the Kremlin) cannot be supposed by the interest of the Kremlin). be encouraged by the international situation. Nothing has gone particularly well for them lately, except perhaps the decline of the dollar a fortuitous windfall - and a lot has gone badly.

Worst News

The worst news of the summer by far was Japan's decision to ig-nore elaborate threats from the Soviet Union and proceed to sign a treaty of friendship and coopera-tion with China. This was a cardinal defeat for the Soviets which symbolized the failure of a diplo-matic strategy that Moscow has

pursued for many years.

At the beginning of this decade it appeared likely that Soviet-Japanese relations would develop into a visorous economic partnership. Japan then seemed willing to invest billions in the development of Siberia's vast energy resources, and the Russians seemed eager to share energy with Japan in return for fi-oancial and technical help. Political relations were less promising but perfectly adequate, and the Rus-sians fairly assumed that Japan's economic interests would prevent any Chinese-Japanese rapproche-ment at Moscow's expense. In the course of the 1970s all that

has changed. Japan obviously sees much brighter prospects in China oow than in the Soviet Union. Most of the ambidous plans for Japanese investment in Siberia have fizzled. Japan agreed to sign the oew treaty with China, knowing that the Chinese and the Russians

The Alarm Over Nuclear Waste

By Rustum Roy

Washington — All this business about nuclearwaste disposal is getting out of hand. After nearly 30 years of neglect by all of us — the scientists, the government, the public and the press - the problem has suddenly taken on enormous porportions in the minds of many people.
Within the past few weeks, two

Senate committees have held bearings on the subject, the president of the United State has appointed an interagency task force to study it, Penthouse magazine ran a major article replete with warmed-over nuclear scare stories from the 1950s and '60s, and an Australian scientist announced - in World War III headlines — that he had found the way to make ouclear wastes safe. It's no wonder people are confused.

The truth of the matter is that mastery of the technology of radioacove-waste disposal is not impossible and, in fact, is not too far in the future. Experimentally, it has been shown that we can make syn-thetic minerals, incorporate into them the nuclear wastes, and immobilize the radioactive atoms so that, when they are huried, even ex-posure to groundwater, heat or pressure will not seriously affect them. We have been doing it at Penn State for five years now, and

similar processes are in various well-managed research and devel-stages of development in Sweden, Australia, the Soviet Union and It is regrettable that the world's

other countries. Over the course of 1,000 years or so, the wastes become as inert as many natural ores. Why, then, haven't we put this

technology to use? Because there are five or six options at this point, and it will save us all time and money in the long run to choose the best combination of solid form and rock type. We are oot, after all, in a life-and-death race to find a

While it is certainly desirable to complete this research as quickly as possible and get on with building possible and get of whith only factories, no one is going to die, no one is going to die, no one is going In suffer in any way, from delaying a final decision long enough to give rational consideration to the alternatives.

Currently, spent nuclear fuels are being stored in pools oear the reactors, where they do no damage and stand no chance of being stolen.

Over a period of 10 years in storage, their heal and radioactivity will become smaller by a factor of 10, so the problem is even being reduced of its own accord. The major portion of our wastes are from the defense operations of the past 30 years, and they likewise, are stored nn federal land under relatively safe conditions.

Costly to Hurry

tf we panie and rush into pro-duction of a waste-storage system now, before we have had a chance to expline the possibilities, we may force the American taxpayer to spend hillions of dollars needlessly and find ourselves in the position. two or three years from oow, of retracing our steps to find the most cost-effective solution.

The panel nn radioactive waste solidification of the National Academies of Science and Engineering which I chaired, recently presented a major report to its sponsoring agency, the Nuclear Regulatory Commission. Included in that report, along with very specific. technical recommendations, were some general speculations on the potential for mastery of this problem. Most members of the panel believe we can have a safe, efficient, ready-to-use method of radioactive-waste disposal within 10 or 15 years, with a centralized,

It is regrettable that the world's cientists did not solve this problem 30 years ago, before we had begun to build ouclear power plants. It was quite simply a lack of foresight and a misplacement of priorities. New, highfalutin science took precedence over a mundane job of scientific garbage disposal.

But the current arena of wild

speculation, from Penthouse's declaration that radioactive waste "is the monster at the end of the oucle-ar fuel cycle, the problem without a solution. . " to the banner head-lines in the Australian newspapers that nuclear wastes have been "made safe," is no way to approach the problem. There is no cause for panic, no reason for alarm. A decade or so from now, we have every reason to believe, we will be ready to begin storing radioactive wastes as artificial minerals or concrete or glass in a salt, gypsum or granite repository for burial 2,000 feet or more underground. In the mean-time, the public and congressional role should be to assure vigilance and diligence in altending to this task by the nation's scientists and engineers. That's what's been miss-ing all along.

Rustum Roy is director of the Materials Research Laboratory at Penn-sylvania State University. He wrote this article for The Washington Post.

Relations with Washington have continued to be bad, with new com-plications arising during the course of the summer. The Russians have now provoked a tougher American attitude toward the sale of high-technology goods to the Soviet Un-ion and also set off a furor in the American intellectual commi that has already damaged Soviet American exchange programs and threatens to terminate some of them. Both are the result of the unseemly crackdown on dissidents

last spring and early in the summer Outsiders may doubt that those reactions worry the Russians, but recent evidence suggests that they do. Uoder substantial pressure, the Soviet authorities backed down dramatically in the case of the two Americao reporters they had accused of "slander" for writing stories on a group of dissidents who had challenged the veracity of Sowet television.

A few weeks ago the Russians seemed bent on a course of action that would have ended at the less in expulsion of the two reporters. but the Carter administration made clear its intention to retaliate sharply if they were expelled, and the case against the two now has been closed. Craig Whitney of The New York Times and Harold Piper of the Baltimore Sun did pay fines in the case, but they did not print retractions ordered by the Soviet authorities obvious desire to intimidate the Western press into less active coverage of dissident news has apparently provoked an opposite reactive coverage.

The emergence of a vigorous new Chinese diplomacy must be the most disquieting development of recent months for the Soviet Union. China has strengthened its relations with the United States and set off a flurry of activity that could end in full diplomatie rela-tions sometime oext year (at least that is the private prediction of sea ior American officials). The Chinese have sealed the Japanese trety, and now they have posed a discomfitting challenge to Soviet power in the traditional Soviet sphere of influence by scading Chairman Hua on his trip to Romania and Yugoslavia. At the same time, the Chinese government under Teng Hsiao-ping has set of on a pragmatic new course that Moscow must find exceedingly ominous, because it suggests that China is abandoning ideologic pa-rity in an effort to make itself

In sum, the world has given the old men in Moscow a good deal to worry about, and at an inopportune time, when they already had worries enough of their own. This is a succession season in the Kremlin. a succession season in the Krem when the leaders must be preoccu-pied above all with the health of President Leonid Brezhnev and the designation in the relatively near future of a new leader.
So the Romanians who decided

modern power.

it might be a good moment to tweak the ear of the Russin bear had a point that deserves some attention in other world capitals, beginning with this one.

Film Star Charles Boyer, 78

PHOENIX, Ariz., Aug. 27 (AP)

— Charles Boyer, 78, the Frenchborn actor who courted a bevy of leading ladies in films of the 1930s and 1940s and became one of the top Warner Brothers stars, died

yesterday at a local hospital.

Mr. Boyer, who would have been 79 tomorrow, was found unconscious at his home. He died a short time after being hospitalized. An autopsy will be conducted. A hospital spokesman said a heart attack was suspected.

Mr. Boyer, whose wife of 44 years, Patricia, died Thursday, became the highest paid star at Warner Brothers in 1945.

During the 1930s and 1940s, he epitomized the continental gallant — suave, impeccable of manner and dress. He played the polished

lover to many of Hollywood's leading ladies, yet had the strength and authority to be convincing as a man neither did anyone else in the film.

moved easily into character parts
with middle age. In one film, he
portrayed the father of Leslie

Dunne, Bette Davis, Ingrid Bergman, Claudette Colbert and Jenportrayed the father of Leslie
nifer Jones, as well as Miss Lamarr. Caron. He seemed to have no vanity about his appearance and willingly played roles in which he looked older than he was even at times appearing without his toupee if the character called for it.

As Pepe LeMoko

Perhaps he is best remembered for his role as the thief Pepe LeMoko in "Algiers." Minnics later mimed him with the line he supposedly used to lure Hedy Lamarr: "Come with me to the casbah."

Turin Shroud Displayed Before Scientific Tests

TURIN, Italy, Aug. 27 (UPI)—
The Holy Shroud, believed by many to be Jesus Christ's burial "special church police," guns in hip cloth with an imprint of his face and body, went on display for the first time in 45 years yesterday, protected by armed church-police and bulletropoof class.

House of Savoy

and hulletproof glass. Church officials said, meanwhile, that a U.S. scientific team has received permission from Archbish-Ballestrero to examine the shroud in October.

The "U.S. Research Conference for the Shroud," which has been trying for years to get permission to study it, will have 24 hours starting at midnight Sunday, Oct. 5, to subject it to modern spiritive technical. ject it to modern scientific tech-

Turin's San Giovanni cathedral was packed to its 8,000 capacity when Archbishop Anastasio Ballesdisplay at an hourlong votive Mass. Thousands more jostled ontside.

Liquid Nitrogen

Guarded by electronic alarms and illuminated by four yellow lights on each side, the cloth was in an upright steel case covered with bulletproof glass. The case was raised above a ramp in the center of the cathedral. To the crowds streaming into the dark sanctuary, the shroud at first resembled a Sept 2

small movie screen. Behind and out of view, an array of pipes and dials fed liquid nitrogen into the case, assuring constant temperature and humidity.

An image of the front and back of a man was clearly visible on the linen cloth. Less clear, but still visible, were brownish marks believed by many to be signs of a nailwound in each wrist and through the feet, with one foot placed over caused by a helmet - not crown. of thorns, scourging, and stabbing in the side.

The cathedral was packed for the Mass, with people standing squashed in the aisles. Loudspeak-

Court Refuses Mitchell Parole

MONTGOMERY, Ala., Aug. 27 (UPI) - A federal judge Priday denied a request by former Attorney General John Mitchell for immediate release from federal prison where he is serving a sentence on Watergate cover-up charges.

But after an informal meeting with lawyers involved in the case, U.S. District Judge Frank Johnson
Jr. ordered the U.S. Parole Commission and Attorney General Griffin Bell to show cause within 10 days why Mr. Mitchell should not be released.

Mr. Mitchell's lawyers say he is the only inmate who has not received credit for medical furlough time and has been denied equal

Archbishop Ballestrero ordered the relic displayed for the 400th an-niversary of its arrival in Turin from the French town of Cham-

bery. It was last exposed in 1933.
The cloth is said by Turin's Society of the Shroud to have been brought to Europe by Crusaders in the Middle Ages. The Society says there are records of it having been in Constantinople in 1093. Since 1453 the shroud has been the property of the Dukes of Savoy, ancestors of Italy's now-exiled royal fam-

Church officials believe that trero of Turin opened the six-week display at an hourlong votive Mass. see the shroud during the showing. The Vatican has never declared the cloth to be Christ's burial

shroud, but several popes have expressed belief.

U.S. to Send Marshall

NAIROBI, Aug. 27 (UPI) -The United States sent the military expert who directed John F. Kennedy's funeral to Kenya yesterday and Britain flew in a two-ton of President Kenyatta at his state

funeral on Thursday. Justice Thurgood Marshall of the U.S. Supreme Court, who helped write Kenya's constitution, was named to head the U.S. delegation to the ceremony. The delegation in-cludes President Carter's son Jeff, U.S. Ambassador to the United Nations Andrew Young, Coretta King, widow of Martin Luther King Jr., Rear Adm. Samuel Packer, commander of the U.S. Middle East naval task force, Rep. Charles Diggs, D-Mich., and Mayor Rich-

Many Speculators Shun Gold Market

NEW YORK, Aug. 27 (AP-DJ) were disappointed when the dollar - Many speculators abandoned the gold futures market last week, decided to take their profits and demoralized by the U.S. dollar's run." relative stability abroad and the government's plan to defend its at Cooticommodity Services Inc., currency by auctioning larger said the realization that the U.S. currency by auctioning larger amounts of gold.

By the end of the week, gold prices had plunged \$9.60 to \$10.70 an ounce on New York's Commodity Exchange Inc. The heavy liquidation pared futures to their lowest prices since late July, when gold began its spectacular climb to record

December gold contracts collapsed to \$202.60 an ounce, nearly \$19 under the prices reached the previous week. Traders said the sharp losses accumulated steadily despite several rally attempts.

Overextended "The U.S. Treasury's announce-

ment that it would sell an additional 3 million ounces of gold knocked the wind out of the market," a trader said. But while the stepped-up gold sales provided the initial blow,

many analysts said the steep decline was the consequence of overextended positions. "The gold market is strictly psy-

chological. When the dollar fell to record lows, people lost their faith in currencies and rushed to bny gold," one analyst said.

"A lot of oew speculators got spoiled by thinking that gold prices were only going higher. So they

New York Stock Market

NEW YORK, Aug. 27 (NYT) - The stock market spent last week knocking on the door marked 900 on the Dow Jones industrial average, but it found few eager buyers at home. It was a week during which individual issues such as National Airlines soared on merger developments and speculative activity reared its bead in other sectors of the market. For its part, the Dow average finally closed at 895.53, with a net loss of 1.30 points for the week.

National Airlines rose 6% points to 36% in a day, propelled by a proposal from Pan American World Airways to acquire National at a price of \$35 a share. Servomation, wooed by a pair of corporate suitors, rose 5% points to 49 on Friday.

The speculation was particularly evident in the action of certain stocks on Thursday. Gambling-related issues formed the core of this speculation — fanned by buying on the part of individuals rather than big institutional investors, according to analysts — but the frenzy spread to other stocks

Resorts International's Class A shares, trading at their loftiest prices ever, climbed 5% points to 103½ after selling as high as 104½. Four years ago, this same stock had been hammered down to a low of one dollar a share. The speculative boom in Resorts International stock has been tied this year to the casino opened by the company on Atlantic City's steel pier. Also, the company recently announced plans to split its stock 3 for 1.

Matching the runup of Resorts on the American Stock Exchange was a surry the same day in Bally Manufacturing on the Big Board. Helping to fit Bally, the leading producer of slot machines used in gambling casinos, as a brokerage bouse recommendation. Bally jumped 2½ points Thursay to finish at 49½ after reaching a record price of 50%.

Turnover, however, remained fairly low, partly due to the holiday season, with professional husiness dominating the market. Retail clients were still generally reluctant to enter the Eurobond market, dealers said but some nerry attracted to flurry the same day in Bally Manufacturing on the Big Board. Helping to lift Bally, the leading producer of slot machines used in gambling casinos, was a brokerage-bouse recommendation. Bally jumped 24 points Thursday to finish at 49% after reaching a record price of 50%.

There was, however, more to come. On Friday, Resorts rocketed ahead 1214 points to 11514, while Bally bounded up 414 points to 54%.

But perhaps the most telltale sign of stock-market exuberance appeared in the movement of a little-known Amex company called Computer Investors Group. This small computer-leasing concern, which had sustained heavy losses since 1973, finished the previous week at a price of just under \$1 a share. Early last week, management reported an operating profit for the most recent quarter, and the stock began to run. On Thursday, it sold as high as 7% - which means a thumping gain of 700 percent within the space of four trading days - hefore simmering down somewhat to close at 6, up a point for the session

Meanwhile, one Wall Street money manager warned that the market reducing the rate of inflation. could be vulnerable to a price correction, simply because so many smaller

Rates Level Off issues have compiled impressive gains within the last two years, especially on the Amex and in the over-the-counter market. Thus, some investors could decide to cash in their profits and enjoy the luxury of paying longterm capital gains to the Internal Revenue Service.

Nothing influences the attitude of investors - and investment advisors as much as the action of the stock market itself. Thus, after they see a prolonged rally, participants generally become bullish. But with a spate of plummeting prices, the bears begin to roam Wall Street. There is, in fact, a saying that goes like this: "When the market is rising who oeeds analysts? When the market is falling who needs stocks?"

Bonds Firmer Despite Credit Tightening

By William Kucewicz

LONDON, Ang. 27 (AP-DI) — Prices, of Eurodollar bonds held very firm this week on hopes that the recent rise in U.S. short-term interest rates will soon peak and the dollar will stabilize or even recover, against the other major currencies.

After losing up to % point at the start of the week, Eurodollar bond prices steadily recouped and fin-ished unchanged to 12 point above week-earlier levels. The price firmness, though somewhat surprising in light tightening U.S. credit con-ditions, was helped by the relative dollar steadiness on the foreign-exchange market and a plateauing of Eurodoliar deposit rates.

said, but some were attracted to high-yielding paper and certain convertible issues, where the underlying stocks have been active.

.The market shrugged off the Federal Reserve Board's decision to boost the discount rate - the fee it charges on loans to member com-mercial banks — to 7.75 percent from 7.25 percent, effective last Monday. The Fed said the move was aimed at belping the dollar and

Rates Level Off

The indifferent reaction to the discouot-rate increase was apparently prompted by the leveling off of other key interest rates. The rates oo federal funds - reserves that banks lend each other appeared to settle this week around 8 3/16 percent and 8% percent af-ter being boosted from their previ-ous target rate of 7% percent. Citi-

Market

points. But, by Friday, Eurodollar rates were mostly unchanged from week-earlier levels and the threemonth rate even dropped % point

to 8.5 percent, bid.

The events left many analysis with a strong belief that the U.S. short-term interest rates will begin to decline some time between the fourth quarter of this year and the second quarter of 1979. "We've had the perception through the summer that U.S. interest rates will peak by the fourth quarter," one Eurobond expert in London stated. "The market lately has been very firm in spite of the Fed's credit moves."

Fed chairman William Miller said that he "hopes that interest rates will peak" by year's end, while noting that they still may rise between now and December. It's possible to keep the current U.S. ecocomic expansion going through 1980, "if we do our job right," and the Fed could "lower monetary growth" without pushing the econ-omy into recession, Mr. Miller said in an interview published Friday.

Need for Restraint

Analysts in Europe emphasized the oeed for the United States to restrain monetary expansion, both as a means of bolstering the dollar's exchange rate as well as combating inflation, but without bringing U.S. economic growth to a standstill. A limited slowdown in U.S. economic expansion is, however, considered probable, though this might help the U.S. balance of payments, experts observed.

The market took encouragement from the series of statements and actions by U.S. authorities concerning the dollar's slide on the foreign-

bank kept its prime rate at 9 percent Friday.

Eurodollar interest rates posted short-lived rises Monday of I to %

Eurodollar interest rates posted short-lived rises Monday of I to %

Eurodollar interest rates posted before confidence in the straight Eurodollar market, apparently believing that the interest rate rise has much further to go.

The first straight Eurodollar market, apparently believing that the interest rate rise has much further to go.

The first straight Eurodollar market, apparently believing that the interest rate rise has much further to go.

"There appears to be recogni-tion, albeit belated, in Washington that there is a serious dollar crisis which is as much a crisis of confidence in the Carter administration as a problem with the fundamenone Eurobond analyst said. Carter has got to meet this head on to restore confidence, even if he

is dragged screaming to do it. The measures that must be taken are the harsh ones, such as tackling the monetary and fiscal prob-lems, not just the easy ones of sell-ing gold for dollars," be continued. "It's going to take a very long time to correct the problems and it will mean nasty medicine. But it will give Carter the chance to stimulate he economy again late in 1979 and into 1980, just ahead of the election.

Major Relly Seen

If the dollar's problems are handled satisfactorily and the U.S. io-terest rates do peak, the Eurodollar bood market could be set for a major rally, some traders argued. They said iovestors could be tempted to lock in the "enormous" profits made due to the exchange rate gains of the Deutsche mark, Swiss franc and yen and to move out of boods with "meager yields" and into higher yielding dollar-denominated issues.
"Not everyooe can hit the top of

the interest-rate structure; prices would explode," one dealer noted. Instead, be urged investors to "start buying oo weakness" in the Euro-dollar sector.

But retail clients did oot appear to be convinced about this scenario, preferring to bide their time. Moreover, there were indications that borrowers are starting to tap

bond offering in more than a mooth was announced Friday by AS Eksportfinans, the finance and credit institution of the Norwegian commercial banks. It intends to offer \$50 million of sinking fund notes, due 1978-86, carrying a 9percent coupoo, said lead managers Citicorp International Bank Ltd. and De Norske Creditbank. The average life of the notes, which are not guaranteed, will be six years and, so far, the response to the is-sue was said to be very encourag-

cause the notes are oot guaranteed and because of Norway's heavy involvement in the depressed shipping market. But syndicate sources said the lack of a guarantee should not pose a problem, given the instirution's backing from commercial banks and the government.

Borrowers May Follow

Eksportfinans' exposure in the Norwegian shippiog sector is 280 million Norwegian kroner (about \$52.94 million) out of total loans of about 4 billion kroner, according to the prospectus,

If the issue is a success, other

borrowers may follow in the straight Eurodollar sector, one trader predicted. This may be the reopening of this sector; the size is just right and the borrower is not unattractive," another said.
In the dollar coovertible sector,

Texas loternational Airlines Finance NVs \$25 million of 15year bonds were quoted Friday at 103.5-104.5 after being priced a week earlier at par. The rise reflected a boost in the price of Texas In-

BHF-BANK International

Arranged by

Inter-Alpha Asia (Hong Kong) Ltd.

We're old hands at new ventures.

Co-creators of first Eurobond.

Band,

In 1957 Petrolina had briefed us on a special produktu. One with no standard sedution. Sictogether with a small group of international banks, we created a new solution: The world's first

Errobanilissie. Since then we've managed and co-managed huncheds of Eurobean issues. Making us one of the world's brailing sponsors of this type of financial

project. And the one with the longest experience. Why new ventures appeal to us.

Because all too ultrn the old answers aren't the nost precise solution to new financial problems. Or maybe it's because we're snobs ainlive prefer to costoni-tailor solutions to each custoner.

Rather than force him intoolf-the-rack answers. But we don't innovate just for innovation's sike. When the standard solution still lits, we offer it. All the expected services.

We have the same range of financial services as other international banks. Aml we back them up with an international neurork of substiliaries. representatives, alfiliates, associates, correspondents, and banking communities like SFE and Associated Banks' of Europe (ABEGOR), And with 1060 retail branches in Belgium.

But what makes us different from other international banks is our inclividual attention to each client's individual problems; our reluctance testick tiothe traditional answers, and ion willingness to stick our neck out in new ventures.

Like the day we stock our name on the world's first Eurobound.

Banque Bruxelles Lambert banking, a matter of people

We are the ABECOR bank in Belgium. Marnixlaan 24, 1050 Brussel. Tel. 02 513,81.81. Telex 26392 BBLIN

Euromarket

(Continued From Page 7) ternational Airlines stock, which closed Thursday at 154, up 1%. Frab Bank International has on offer \$25 million of eight-year floating-rate notes, carrying inter-est of 4 point above the London interbank offered rate with a minimum of 6¼ percent. European Investment Bank plans a \$100-million issue, due 1990.

tolististed Trade

EIB also intends to raise 75 million guilders (about \$34.3 million). The seven-year notes, carrying a 7.25-percent coupon, are expected to be priced at 99.5. Lead manager is Amsterdam-Rotterdam Bank.

In the Deutsche mark sector, trading was generally more active and prices gained 4-to-1/2 point on the week. A 10-year issue was announced by the Commonwealth of Australia for 200 million DM, led by Deutsche Bank. It should "have no great problems," one trader said, noting a "somewhat weak" 6-percent coupon but adding that "Australia is a good name."

The price of a 150-million-DM, 10-year Eurobond of Den Norske Stats Oljeselskap AS (Statoil) was fixed Friday at 99.5, with a 6-percent coupon, Deutsche Bank said. The issue is guaranteed by the Norwegian government

The strength of the Tokyo stock market, one dealer said, contributed to the attraction of Trio-Kenwood Corp.'s 40-million DM, eightyear convertible issue, which was priced at par, bearing a 3.5-percent

semi-annual coupon.
Similarly, Cassio Computer has on offer 40 million DM of unguaranteed convertible notes, due 1985. The notes will be convertible into Cassio shares starting Novem-

Credit national is negotiating a five-year, 100 million-mark private placement, with 5.75 Pc coupon and an indicated price of 99.5. Sources said. Commerzbank ag is expected to be lead manager. Elsewhere, Banco Nacional do Desenvolvimento Economico, of brazil, plans to offer for public subscription 75 million Swiss francs of 5 percent, 10-year bonds, Credit Suisse said.

Dave Revering of the Oakland A's enters the record book by becoming the first major league baseball player to be ejected from a game by a fill-in umpire during a one-day strike. Revering was arguing about a called strike three with Al Foreman before he got the thumb in a game against the New York Yankees. AMERICAN LEAGUE

Friday Baseball: Reuschel Pitches and Bats Cubs Past the Reds, 5-2

CINCINNATI, Aug. 27 (UPI) — Rick Reuschel drove in three runs and teamed with relief ace Bruce Sutter to pitch the Chicago Cubs to a 5-2 victory over the Cincinnati

Reds here Friday night. A walk to Dave Kingman and singles by Manny Trillo and Tim Blackwell preceded a two-run, bases-loaded single by Reuschel in the second inning and the Cubs added two more runs off Mike LaCoss. 3-4, in the fourth inning. Singles by Kingman and Trillo, a sacrifice by Ivan DeJesus and an intentional walk to Blackwell loaded the bases before Rouschel delivcred a sacrifice fly and Greg Gross

added an RBI single.
The Cubs added a fifth run in the sixth off Pedro Borbon when Delesus doubled and scored on Blackwell's single.

Reuschel departed after seven innings during which he limited the Reds to one run and four hits. Walks to George Foster and Dan Driessen and a single by Johnny Bench gave the Reds a run in the fourth and they added their second in the eighth off Sutter when Joe Morgan walked and eventually scored on Foster's fielder's choice.

Dodgers 6, Phillies 5

slumping Philadelphia, 6-5. The Dodgers won when Jerry Grote's ground single up the middle scored pinch-runner Teddy Martinez from second base.

Expos 8, Giants S

At San Francisco, rookie pitcher Dan Schatzeder drove in three runs with a homer and a single as Mon-treal beat San Francisco, 8-5. Andre Dawson and Ellis Valentine hit back-to-back homers for the Expos in the seventh. Darrell Evans hit two bomers and Larry Herndon one for the Giants.

Astros 7, Pirates 5

At Houston, Enos Cabell drove in two runs and scored twice to help Houston snap Pittsburgh's 10game winning streak with a 7-5 tri-umph. Cabell tripled home a pair of runs in the fifth to lift Joe Niek- straight. ro, 11-10, to victory.

U.S. Cougars Bow

IOHANNESBURG, Aug. 27 (AP) — The U.S. Cougars played the best rugby of their South African tour yesterday but it was not enough as they bowed to the beavi-ly favored Gazelles, 20-16, in the fi-At Los Angeles, two ninth-inning nal match. The Cougars compiled a runs enabled Los Angeles to defeat 1-5 record on their 24-day visit.

LaCock Cleared

After Shooting KANSAS CITY, Aug. 27 (AP) -A grand jury has exonerated Pete LaCock, Kansas City Royals first baseman, and members of his party in the fatal shooting of an armed

LaCock, his wife and two other couples were robbed last weekend by three men near a shopping center, the police said. One of LaCock's companions was wounded and one of the robbers threatened to shoot the pregnant Mrs. LaCock.

The police said LaCock and his companions chased the trio and, a block away, captured Alex Clark, 17. Police reports said Clark was shot in the head with his own gun as LaCock and his companions attempted to turn him over to an offi-

Lee May hit a two-run homer for unearned run in the fourth inning to give Cleveland a 2-1 victory over to give Cleveland a 2-1 victory over Chicago. Rick Waits allowed five hits over the first eight innings but oceded relief belp from Sid Monge and Jim Kern in the ninth to gain his ninth victory against 13 losses.

Rangers 7, Royals 2

At Arlington, Texas, Richie Zisk's grand slam highlighted a sixrun sixth inning that carried Texas to victory, 7-2, over Kansas City. Trailing 2-0 and held to two hits off Rich Gale in five innings, Texas started its rally after two were out in the sixth. Jon Matlack pitched a five-hitter for the Rangers.

Blue Jays 7. Twins 3

At Toronto, Al Woods drove in four runs with a homer and two doubles as Torooto defeated Minnesota, 7-3. Don Kirkwood and Mike Willis combined to hold the Twins to nine hits.

BOOKS

SELECTED LETTERS OF JOHN O'HARA

Edited by Matthew J. Bruccoli. Illustrated. Random House, 538 pp. \$17.95.

Reviewed by Christopher Lehmann-Haupt

IT IS now more than eight years since John O'Hara died, and though it is still not outlandish to surmise that be may one day be the writer people read to learn what life in the United States was like during the first half of the 20th century, his own prediction of an O'Hara boom has not yet come to pass, at least so far as I'm aware. ("I think I know my place in Am. Lit. as of five or 10 years after I cool, but I would love to enjoy some of it now, while I am alive," he wrote to a friend in 1960.)

Meanwhile, we have his "Selected Letters" to read — a companion volume, edited by Matthew J. Bruccoli of the University of South Carolina, to go with Bruccoli's "The O'Hara Concern: A Biogra-phy of John O'Hara." And it is an O'Hara reading experience in every familiar respect — in its prickly combativeness; in its concern for getting the record exactly right, especially where it comes to slang and manners; and in its obsession with the accoutrements of social status.

In a typically astute review-essay of O'Hara's work that Gore Vidal wrote in 1964, the point is made: "Right off, one is struck by the collective narcissism of his readership . . . Today's reader wants to look at himself, to find out who he is, with an occasional glimpse at his next door neighbor . . . Never before bas the alternative world [of fiction] been so close to the actual one as it is in the novels of John

O'Hara and his fellow commercial-Now, this observation is no doubt true, as far as it goes. But one suspects that there was something more going on - that people also read O'Hara to see whether they passed muster, to see bow they measured up against his obsessively hierarchical standards of social and sexual status. At any rate, to calibrate one's place in O'Hara's world seems the main point of reading these letters. For by implication not so subtle, O'Hara is forever throw-ing out challenges — to belong to the right clubs, to know the best people, to win the most prizes, to make more money in order to buy the correct objects, and, not least of all, to be among those all-too-select few who appreciate the genius of John O'Hara, True, most of these challenges are directed primarily at

Solution to Friday's Puzzle

O'Hara himself, but this hardly suggests that the rest of us are excused from the game. There has to be someone to set up those exclusive gentlemen's clubs, and there has to be the rest of us to be excluded.

Of course, it would be mislead ing to suggest that this collection is solely the map of a social climb. There are plenty of places to stop and catch one's breath, and the scenery is interestingly varied There are lengthy and shrewd to-flections on the art of writing and there is solid practical advice on the business of publishing, astute analyses of many of O'Hara's contenporaries in the game of fiction, and affectingly tender solicitousness for

O'Hara's family and friends. And if you squint a little, there is evidence of a sense of humor, albeit often bitter, sometimes mean; and occasionally elephantine. ("When I was a child someone apparently put a fist in the parcel post and sent it to my dear beloved Daddy. At least it always felt like he was using a mailed fist.") Almost all of the letters are written with bite and grace. After all, as Bruccoli points out in his brief Introduction. John O'Hara wrote them.

Still, to read most of these letters is to enter a world of fierce contentiousness. I am better than the think. O'Hara keeps insisting No. only do my novels and stories have meanings beneath their authenic surfaces, but I have also seen it a and known everyone, and I have memberships in clubs, and I own: clothes made in London and a fleet. of English cars, including a Roll. Royce, which I bought despite a promise that I would only reward myself with one if I won the Nobel Prize, which is all I lack now and all that I want. Try all this on for size, dear reader, and see how you

measure up. And dear reader either gets him self involved in the game or close the book and forgets the competition — forgets everything indeed except for O Hara's passionate de votion to work. "The only reply a the critics is, curiously, the same it -ply to the hostile and to the friend ... ly," be wrote to John Hersey i 1965. "It is work . . . I'm not s sure amor vincit omnia, but wor keeps us going. It is a reply and a answer." In the pace he set himsel if not in the motivation, he remine one of another bourgeois wile Thomas Mann, who, surprising enough, O'Hara says influence him. I am not at all certain the a sults can be remotely compared

book reviewer for The New You

that may yet be for posterity to ir

cide - but as far as devotion F -their craft is concerned, they we two of a kind. That is one of it. few positive examples that Jok. O'Hara sets in this book. But it i the one that matters most.

CHESS

By Robert Byrd

NEW YORK — Chess champion Anatoly Karpov of the Soviet Un-ion capitalized on weak play by Viktor Korchnoi to win two games in a row last week in their title match in Baguio City, the Philli-pines. The 27-year-old Karpov took the 13th and 14th games.

At adjournment, it was expected that Karpov would win the 14th game, in which be held a solid material advantage of bishop plus three pawns for a rook. On the other hand, Korchnoi, who had a positional advantage in the 13th game, was considered to have fair chances to win that one.

Korchnoi's play after adjourn-ment in the 13th game was unaccouotably atrocious. The man who has been acclaimed for his brilliant adjournment analysis committed error after error, beginning with his sealed move.

The only secure way to pursue victory in the 13th game would have been with 41 R-B2 followed by 42 N-N4 and 43 NXP, winning a second pawn while keeping a grip oo the vital center squares. Instead, Korchnoi's 41 R-R7 was

wrong, especially since recovering the exchange by 41. . R-B3; 42 N-K5, QXP check; 43 K-R2, QXP; 44 RXR, Q-B5 check; 45 K-R1, RXR; 46 KXR, QXR would have allowed Karpov to draw easily.

Of course, Korchnoi's 42 RXR, RXR; 43 P-Q5 did insure him the gain of a second pawn because 43. . .PXP?; 44 BXP would have cost Karpov the exchange. But this line of play had two

drawbacks: Karpov was able to mobilize his bishop at ooce with 43. . .B-K4: the QBP after 44 PXP was too easy to blockade. There was another factor militat-

ing against Korchnoi's winning chances — the exchange of rooks by 42 RXR, RXR is normally advantageous for the defender, in this case, Karpov.

Still, baving bungled his oppor-tunity to press the game to a suc-cessful conclusion, there was no reason for Korchnoi to lose it. For

the purpose of making a draw, in line of play should have proved

However, Korchnoi's 56 Q-KR4 was one of the worst blunders and made in a world championshi match. Since this was the last more of the second time control, one can only assume that he let himself y into terrible time pressure and is to choose something—anything with a few seconds to go before in the choose something that it is to be seconds to go before in the choose something that it is the choose something that is the choose something the choose something that is the choose something the choose something that is the choose something that it is the choose something the choose somethi clock flag dropped, registering forfeit.

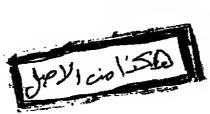

After 56 Q-KR4, R-K5, the w

queen had oowhere to go and kor chnoi was compelled to weaken is pawn formation fatally with 57 F pawn formation fatally with 57 B4. That was all Karpov neededhis 57. B-N3 committed no defense to 58. RXP check, expering the white king. On Karpovi, 61. R-K5, there was no defense to the coming 63. B-R4 check for example, 62 N-N 4, QM check: 63 N-Q3, B-R4 check: 64 B1, Q-R8 check; 65 B-N1, RM check cleans up mightly. This Korchnoi had to throw in the towel. The moves of the 13th game.

Caulkins, 15, tied the world mark of 2 minutes, 9.87 seconds in winning the women 's 200-meter but-terfly. Later she helped the U.S. women's team establish a world mark of 3:43.43 in the 400-meter

BERLIN (IHT) - When Tracy Caulkins set her four world re-

cords at the world swimming championships in Berlin last week no judge's gun, but an individualized beeper, saw her off; no crouching official, but an electronic touch-pad, met her finish; and no

human hand, but an analog computer sent her times to waiting officials, television sets and scoreboard. All done in the whoosh of

a light beam, all done by advanced electronics - with a little belp

The story starts in an overburdened French railyard in the 1920s.

How in record the onslaught of freight cars and still have time for a civilized long lunch? One Monsieur Debrie had the solution: an

open shutter camera with the film sliding past the aperture in time with the freight cars entering the yard. Such a camera will show

everything a blur except the one thing M. Debrie was interested in:

railcars. The principle, if not the railcars, was taken over by a

somewhat more graceful industry, and the first sports photo-finish was made at a U.S. horse-track in 1929.

Interpreting the photos proved surprisingly tricky. While officials debated the merits of defining nostril or upper-lip as beralding the arrival of the equine species, they always had the nagging feeling that the real winner was there to be picked out if they could just

see...faster. Like a clock. Like a clock antomatically triggered by the

start and finish of a race. The backroom boys at Bulova and Omega

got busy and were soon successful; the game ever since has been to match the technology to the sport. In swimming the need was quite

In the Old Days

"Used to be there were great hassles between the judges," re-counts Bill Lippman, of the International Amateur Swimming Fed-

eration. "We'd sit down at poolside and just take a little vote." No longer. Omega's new clocking system, which made its debut in Berlin last week, leaves only the stroke-evaluating judges in busioess during the race, its hundredth-of-a-second accuracy takes care

The system used in Berlin is completely "hands-off." The clock

readings are coded as an electron stream which, routed by comput-

er, rematerializes as numbers on scoreboard and television screen

with oo possibly tired, definitely hurried clerk doing the transcrip-

tion. As one CBS technician remembers: "Just try making no mis-

takes copying hundreds of 5-digit numbers with a Howard Cossell

nized; but another human limitation is less easily outstepped. Ski-

ters have only a few seconds to start their run, and the clock starts

when they do. But since the clock for swimmers starts when the

beeper goes off, a swimmer who remains on the block a fraction of a second too long can swim 100 meters of water at a world-record

Now self-determined swimming starts would yield more "pure"

times, true, but they would also destroy swimming as a competitive

sport. And it's neck-and-neck competition that so often arouses two

soon be facing: clocks are oow one step ahead of even the best

facilities in which they are used. The championship pool was rebuilt

with thoroughness last year - even the 1-centimeter thickness of

the touchboards was taken into account. But although the architect

can justly call this "the most accurate pool ever," Lane 4 is some 3

millimeters longer than Lane 3. This means that if Caulkins had

started the 200-meter butterfly Saturday night in Lane 3 instead of

Lane 4, she would have broken the world record by a good three hundredths of a second instead of just tying it. Until such slippage is calibrated away, any improvement in the clocking accuracy will

A Change of Tactics

These measurement developments have had their rebound effects on swimming itself. The U.S. team coach, George Haines,

observed: "In the early days swimmers would sometimes fake their finishes, making a splasb at the wall and that sort of thing. But the

touch-pads that stop the clock today won't be set off by such a wave, so there's oo more needless splashing, no tossing of a handful

ol water towards the wall at the finish. On the positive side we are

seeing a bit more rolling to the side, especially in the freestyle, as

The face of the game is changing. Not much longer will sports minded judges crouch by the finish line, cradled stopwatches in

hand - they're changing into computer specialists leaning over

But since people are still involved unpredictability is just dis-

placed, not vanquished: "It was my first big assignment," recalls Pierre Tosin, now sports director of Omega Timing, "the swimming

trials at Mexico City in '66, and we were using a new starting gun that plugged in to start the timing clocks. Well the starter must

have come straight from the ranch: Once the swimmers were on the

blocks ready to go he dropped the hooked-up starting gun, reached

under his jacker, pulled oot an ivory-handled real pistol, and blast-

ed a bole in the ceiling with it. Naturally the swimmers took off,

Manning, who hit his first 18 passes last week in a losing effort to Tampa Bay, completed 9 of 16 for 121 yards against the Oilers as the Saints took a 14-0 balftime lead.

Cardinals 12, Chiefs 7

At Kansas City, Jim Hart passed 10 yards in rookie Dave Stief for a touchdown early in the second quarter and St. Louis held on to down Kansas City, 12-7, in an error-filled game.

Hart connected with 10 of 15 passes for 77 yards before giving way to reserve Steve Pisarkiewicz. The cootest was played in rain that varied from moderate to heavy from the second quarter on. The downpour, which caused a 38-minute delay in the first half, caused many fumbles and penalties.

Bengals 17, Packers 14

At Milwaukee, Archie Griffin ran 12 yards for one touchdown and caught a 14-yard pass from Ken Anderson for another, leading Cincinnati to a 17-14 victory over Green Bay.

The Packers, stopped on fourth down from the Bengal ooe in the third quarter, scored with 9:17 to play on rookie Dennis Sproul's four-yard touchdown pass to Eric Torkelson after a 28-yard pass interference penalty against Melvin Morean. Paul Coffman scored the Packers' second touchdown on a four-yard pass from Sproul with 27 In other weekend exhibition seconds left in the game.

Vikings 30, Bills 27

At Bloomington, Minn. Rick At East Rutherford, N.J., James Danmeier kicked a 43-yard field Harnis's 20-yard touchdown pass to goal with three seconds remaining Johnny Rodgers and Mike Fuller's to rally Minnesota to a 30-27 victory over Buffalo.

At Denver, Paul Hofer sparked San Francisco in a 24-13 victory

en times, all in the first half, and

49ers 24, Broncos 13

Washington starter at quarterback,

entered the game and hit Danny Buggs with a 68-yard touchdown

over Denver. Hofer, a 195-pound fullback out of Mississippi - in his third season with the 49ers played only in the second half but burst the Orange Crush defense for more than 100 yards and a touchdown in the fourth quarter that put the game away for the 49ers.

O.J. Simpson carried the ball sev-

gained Only 13 yards. But he Taiwan won four successive cham-caught a 62-yard touchdown pass to give San Francisco a 14-7 lead. The sharp-fielding Taiwan team,

representing the Pin-Kuang Little

Ramon Little League, scored its only run with two outs in the bottom of the first when Pan walked three batters and right fielder Mike Myers brought bome losing pitcher Erik Johnson with a single.

The tournament brought together boys up to the age of 12.

Only One Shows Up.

Maze Race for Robot Mice Fails to Lure Contestants

By Malcolm W. Browne

crowd packed the special hleachers set up around the track and five real mice to enter. A live rodent television organizations had their cameras trained on the action.

The second regional running of the "Amazing Micro Mouse Maze Contest" for robot mice was about to start. About 6,000 entrants had been registered for the great race with its sponsoring organization, the Institute of Electrical and Electronics Engioeers, and there were high expectations for thrilling sport.

Some leading U.S. makers of computers and electronic equipment had cootributed \$250,000 worth of components and parts for the use of would-be competitors in building their mechanical maze-

running mice.
But when race time came Friday.

only one mouse showed up.
Organizers of the robot mouse race were disconsolate and unable to account for the failure of the event, which was to have been a high point of the three-day conveotion that the IEEE is holding in

Philadelphia.

At their last race meeting in Anaheim. Calif., in June, six robot mice had ruo, and one shot through the maze in 51.4 seconds. It had been expected that many engineers would want to beat that time.
The winner of the final heat,
which is scheduled for next June in

New York, will get a \$1,000 prize.

The object of the races, according to officials of Spectrum and Computer magazines, specialist journals published by the IEEE, is to encourage engineers to huild the sensing, logic and memory circuits needed to steer a robot mouse through complicated problems without human help. Considerable ingenuity is required to pack a

complete sensing and guidance sys-tem into the 7-inch-wide track stipulated for the maze.

Evacuation Accepted By Bikini Islanders

MAJURO, Marshall Islands, Aug. 27 (UPI) — Bikini islanders who will be evacuated oext week ogy and elsewhere, and some have because of lingering radiation from the U.S. nuclear test program have

agreed to leave without resistance.
The islanders' decision was made after the U.S. Interior Department promised that they may visit Bikini once or twice a year.

NEW YORK, Aug. 27 (NYT) — modern fighter planes through mazes of abstacles to their targets. To enliven the race, the rules To enliven the race, the rules were written to make it possible for would have given mechanical contenders n standard of logic and learning against which to pit their microprocessor hrains. But no one brought any real mice to Philadel-

> Entrants were oot permitted to know the design of the 8-by-8-foot maze in advance, and the course was kept under a cloth cover until post time.

In the end, the sole entrant breezed through the course in 4 minutes and 45 seconds, which was described as "reasonable time for a muddy track." Because of the limited field, there was no betting.

The builder of the winning mouse was Ernest Kalbfleisch of Rochester, N.Y., an engineer with the Eastman Kodak Co. Mr. Kalbfleisch said that he had spent about \$65 huilding his mouse and had not needed any of the sophisticated hardware offered by the computer companies, because his mouse was designed to navigate just by feeling its way along the chancel wall of the maze.
Roger Allan, one of the race

organizers, criticized this system because the spirit of the race is to put smarts into these mice, not just mechanical sensors."

The Kalhfleisch mouse, named Charlotte, was decorated to look like a mouse, and some of the decorations were functional. Its eyes, for example, worked in helping to sense the mouse's position relative

to maze channels. The making of mechanical animals in the last two decades has been more than a mere pastime for hobbyists. Robot animals have attracted engineers, electricians, psy-

chologists and neurosurgeons. Some of the robot animals made in laboratories have been equipped with sophisticated analogues of oatural learning and conditioning Similar problems must be solved outural learning and conditioning by the mini-computers steering systems and have been used in experiments to study the learning process in real animals and human

> Mechanical and electronic analogues of reflex actions in nerves and muscles have been huilt at Massachusetts Institute of Technolproved useful in medical research. But, because of the poor show in

> Philadelphia, organizers of the race said they are beginning to suspect that appeals to the gaming instinct may not be the best way to stimulate scientific thought.

It is not only the quality that counts. The prices are related to the size of the artwork. . . We pay more for a large painting. . . than for smaller ones.'

The Dutch Way of Supporting Artists

By Jonathan Kandell

MSTERDAM (NYT) — Twice a week, Amsterdam's deputy director of social affairs, Jaap Maasdam, meets with a few museum officials and artists to survey a large inventory of paintings and sculptures in a municipal huilding overlooking a murky canal.

Working quickly, within less than an hour, the group sizes up the art objects and agrees to buy them at prices ranging from a few hundred dollars to more than \$10,000.

In an average week, Maasdam, acting on behalf of the city government, will spend \$250,000 — all of it on works hy Dutch artists almost unknown outside their immediate circle of friends, and the vast majority of whom will never be considered artistic successes.

Masdam, who does not pretend to be a comoisseur, has a no-onsense approach to his purchases.

"It is not only the quality that couots," he explained. "The prices are related to the size of the artwork. Obviously, we pay more for a large painting or sculpture than for smaller ones."

Wary Eye

A curator from Amsterdam's Stedlijk Museum, Tynen van Grootheest, who does claim to know something about art, cast a wary eye over a recent day's assortment of canvasses and bronzes.

"I can't say I would buy any of this for myself, but that isn't the

The debate rages perenially across the Atlantic over whether the United States or Western Europe does a better job of supporting the arts and artists. When France spent \$200 million to build the Georges Pompidou National Center of Arts and Culture, which opened in Paris last year, critics in the United States pointed out that Washington contributes

only \$100 million a year to support all museums, symphony orchestras, operas and other cultural activities throughout the country. A report issued last year by the International Labor Organization, based in Geneva, asserted that artists' incomes in a number of West-ern European countries fall substantially below the prescribed mini-

ern European countries fall substantially below the prescribed minimum wages and that there has been a decline in the ranks of artists in several of these nations.

One of the few countries singled out for praise by the ILO was the Netherlands. Three decades ago, the Dutch began a federally funded program to alleviate the financial plight of artists. Rather than lose painters and sculptors to emigration abroad or risk having them abandon their professions, the Dutch government decided to huy their works — at prices far higher than those offered by private dealers and collectors.

dealers and collectors. In return for a oumber of paintings or sculptures, the government gives Dutch artists an income well above what they could expect from unemployment benefits.

Run Amok

But in recent years, the arts support program has run amok, as government officials like Maasdam readily concede. There are at least 2,000 artists living off the program, known by its Dutch initials, BKR. The national government spends more than \$30 million a year to buy their works, and additional millions to maintain the bureacracy needed to handle these purchases and their storage.

In Amsterdam, alone, there are 60,000 paintings, sculptures and graphic art pieces bought under the BKR program in storage, waiting for collectors who are in no hurry to purchase them even at giveaway

The Dutch government is oow experimenting with the idea of allowing citizens to each borrow two pieces of this vast art inventory and keep them in their homes indefinitely for a nominal fee of about

"It would be difficult to determine whether the BKR program is a way to encourage art or simply a social welfare system for artists," said Van Grootheest, the musuem curator.

The arts support program began as an aid to older Dutch artists living in poverty at the close of the World War II. By the early 1950s, the program expanded to include struggling young artists until they could support themselves.

Permanent Support

Although conceived as a form of transitional aid, the BKR turned Although conceived as a form of transitional aid, the BKR turned out to be a permanent support system for artists. Only a score or so of its recipients have gone on to successful careers as independent artists. Most of the rest have been unable to survive on the private art market, and attempt to stay in the program until the 65-year retirement age, producing all their art for the state or local communities.

But with a dozen new artists joining the BKR ranks every month and with the budget billowing into many millions of dollars, the program has become controversal

program has become controversial.

"The public reaction to the program is bad," said Maasdam. "Until about five years ago, most people liked the idea of government support for artists. Then we started trying to send all this art out into the communities — to public buildings, housing projects, parks. But people couldn't stand the art. We're trying to defuse this bad feeling by asking communities to decide what kind of art they want in their oeighborhoods. And now it's the artists who are unhappy because they say they are being forced to paint and sculpt for the public taste." program has become controversial.

To qualify for the BKR program, an artist must be at least 25, a graduate of a recognized art academy, have no visible source of income, and he approved by a commission of government officials, museum curators and other artists. These commissions, which accept one out of three applicants, are responsible for the purchase of art works and are empowered to determine if an artist is maintaining

Examples of Payments

Incomes are determined by the artist's age and family situation. A bachelor under 35 receives about \$170 a week, a rent subsidy, and free studio and supplies. A married painter over 45 is entitled to about \$275 a week.

The government commissions set the prices for the art works turned over to them by the painters and sculptors.

The artists are allowed to sell their works on the private market for

up to \$170 a week. If they exceed this limit, the additional income is

Subtracted from their BKR benefits.

Museum officials maintain that the mooey could be better spent in new acquisitions for their institutions. They argue that the private market is the best judge of art quality and that it should be revived hy offering collectors and husinesses tax havens for art purchases, as

ermitted in the United States.

Other BKR officials contend that politics are inseparable from aesthetics, and that the museums and the private market constitute an elite that has mocopolized art.

"We believe that art has a social-cultural function besides aesthetic value," said T.S. Tjoa, of the Amsterdam agency that stores and lends out art acquired with government money.

"All the paintings and sculptures acquired under the government arts support system are public property, paid by tax money," said Tjoa. "So this art should flow back to the public, It is not enough to place a few art works in museums or private galleries. They should be lent out to private citizens. We have to go out and confront ordinary

PEOPLE: Midge Costanza Zun Former Boss Carter Midge Costanza Zings

Former White House aide Midge demonstratora and National Costanza made President Carter Guardsmen that killed four and inthe butt of a comedy routine in Los Angeles, but says they parted "the best of friends." She quipped that she knew Carter was a "bornagain" Christian, "but I always wondered why he would want to come back as himself." Miss Costant price of the state of the same parter of the same state of the same s tanza resigned in May after her col-orful comments and outspokenness became an increasing irritant to top White House officials. Her jabs were made at a \$50-a-plate lunch that raised almost \$40,000 to fight an initiative on the November ballot in California that would authorize firing openly homosexual teachers from public schools. Recalling Carter's campaign disclosure that he had "lusted" in his heart, she

said: "Jimmy Carter is the only president in history who believed beartburn was a venereal disease." On her status as the highest-ranking woman in the White House, and being the only woman at a state dinner: "I was so excited because I had never cooked for 500 people before."

George Segal's life-sized sculp-ture depicting the hiblical tale of Abraham has been rejected by Kent State University officials as too controversial. The statue was commissioned to commemorate the 1970 student shootings on the Ohio campus. The tale is of a 100-year-old patriarch ordered by God to prove his faith by slaying his only son Issac. God stops Abraham be-fore the execution. Officials said that Segal's "knife at throat theme" is supposed to be about "a moment of decision" but because there is litthe emphasis on the age difference between sculpted father and son, the work is too reminiscent of the clash between student anti-war

jured nine students.

Singer Pat Boone has used a mail-order acue medication that he endorses, Boone spokesman James Cook says. Last Monday's People column, reporting on a United Press International dispatch from Dallas, said Boone had admitted in answer to a suit that neither he nor his family had tried Acne-Statin which he endorses in radio and television commercials. Joy Hites who filed the suit against the singer and Karr Preventative Medical Products Inc., of Beverly Hills. Calif., said she used the product because of the endorsement, and that it gave her blisters and permaner it gave her blisters and permaner scars. The singer had been asked to "list every independent test, analysis and or study you or your agents performed to determine the efficacy of the cream." Boone's response was, "None." UPI incorrectly inferred that neither Boone nor his family had used the preparation. "In fact," Cook said, "Mr. Boone's daughters used the product — and obtained good results therefrom — before he ever endorsed it."

Louise Joy Brown appears nor mal, easing lears that her conception in a laboratory might came congenital defects, a team of British pediatricians reported in the latest issue of the Lancet, the British medical journal. "She's gaining weight marvelously and is very beautiful," Dr. Patrick Steptne, who pioneered the in vitro technique, said in a BBC radio interview.
